

My Orange

Apps, FAQs, Contact numbers

Date: 16 Sept 2012

Platform: Native iPhone

Document type: Interaction design specification

Country: Generic

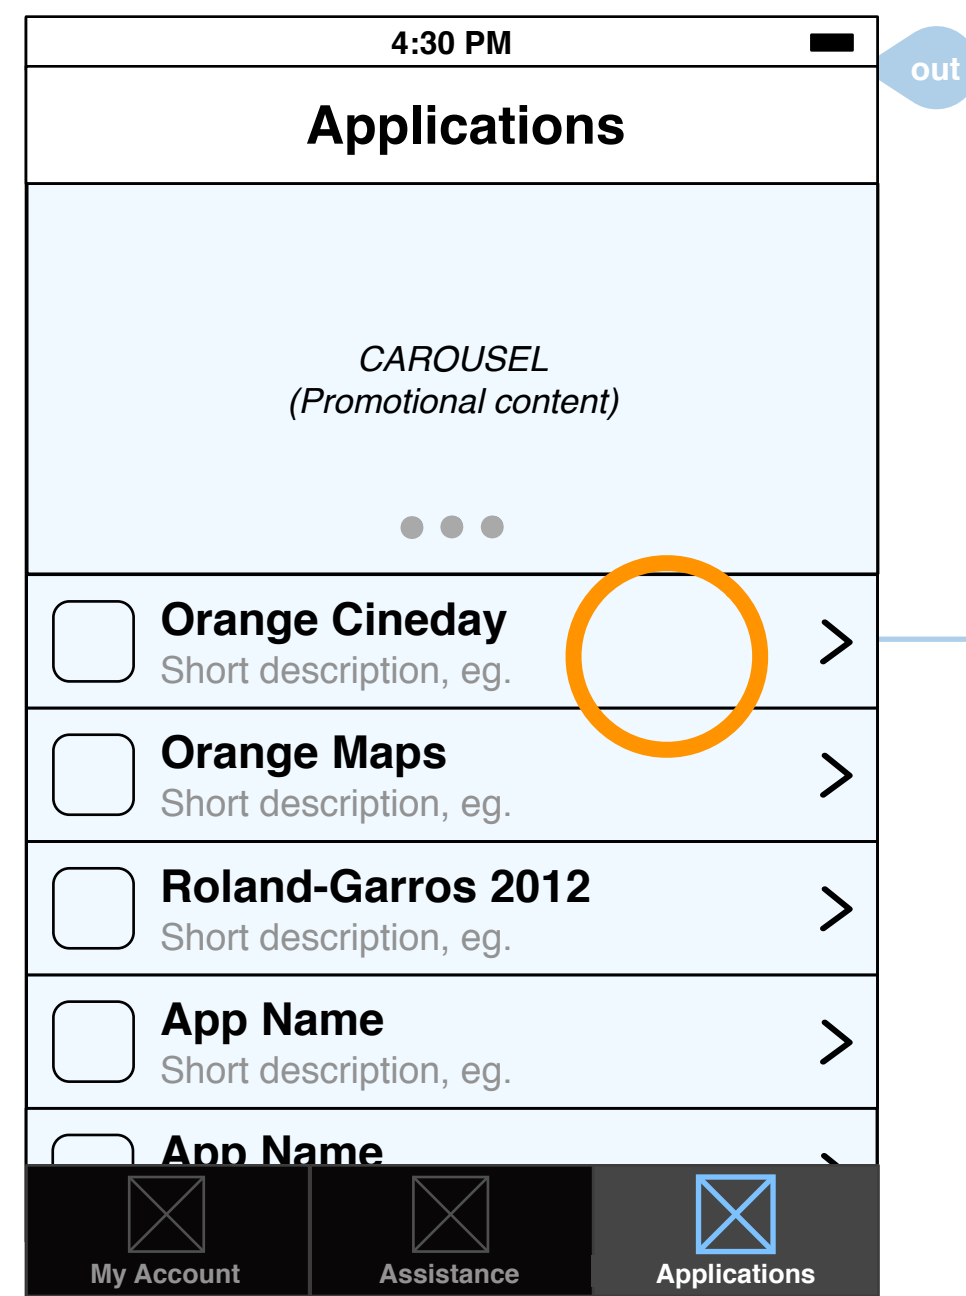

Author: Fabrice Dubois (D&U), fabrice.m.dubois@orange.com

New in this version

- 1 Contact Numbers: Replaced action sheet with simple dialog.

1 Apps

1

App list view.

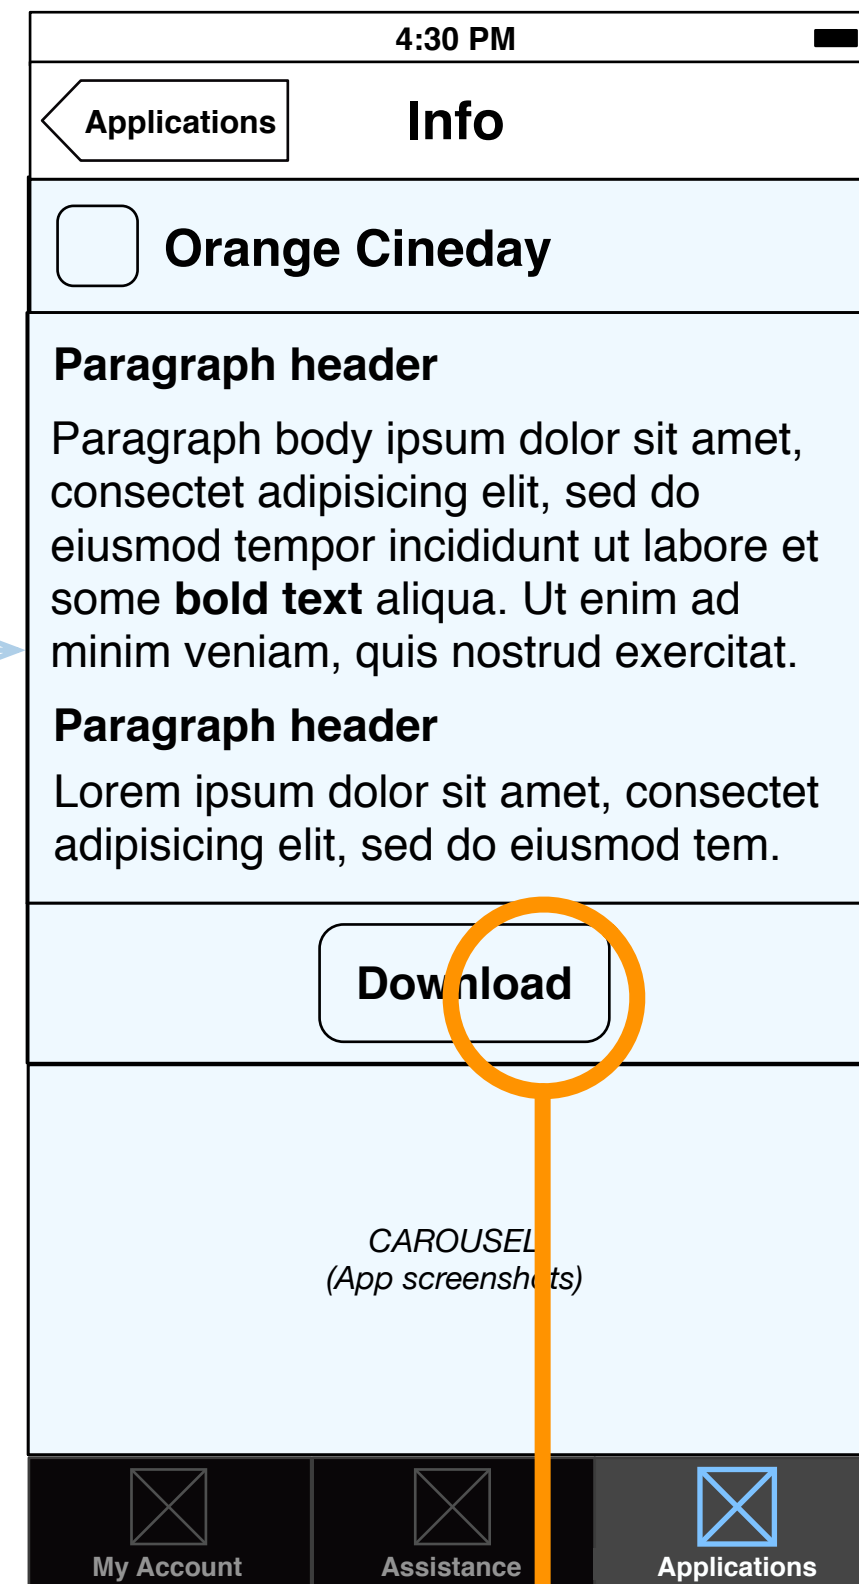

Design for content areas may vary. Please refer to the pattern document [1] to see supported configurations.

Content areas are filled with blue, above.

TODO: Standardise dimensions of:

- carousel items
- carousel container

2

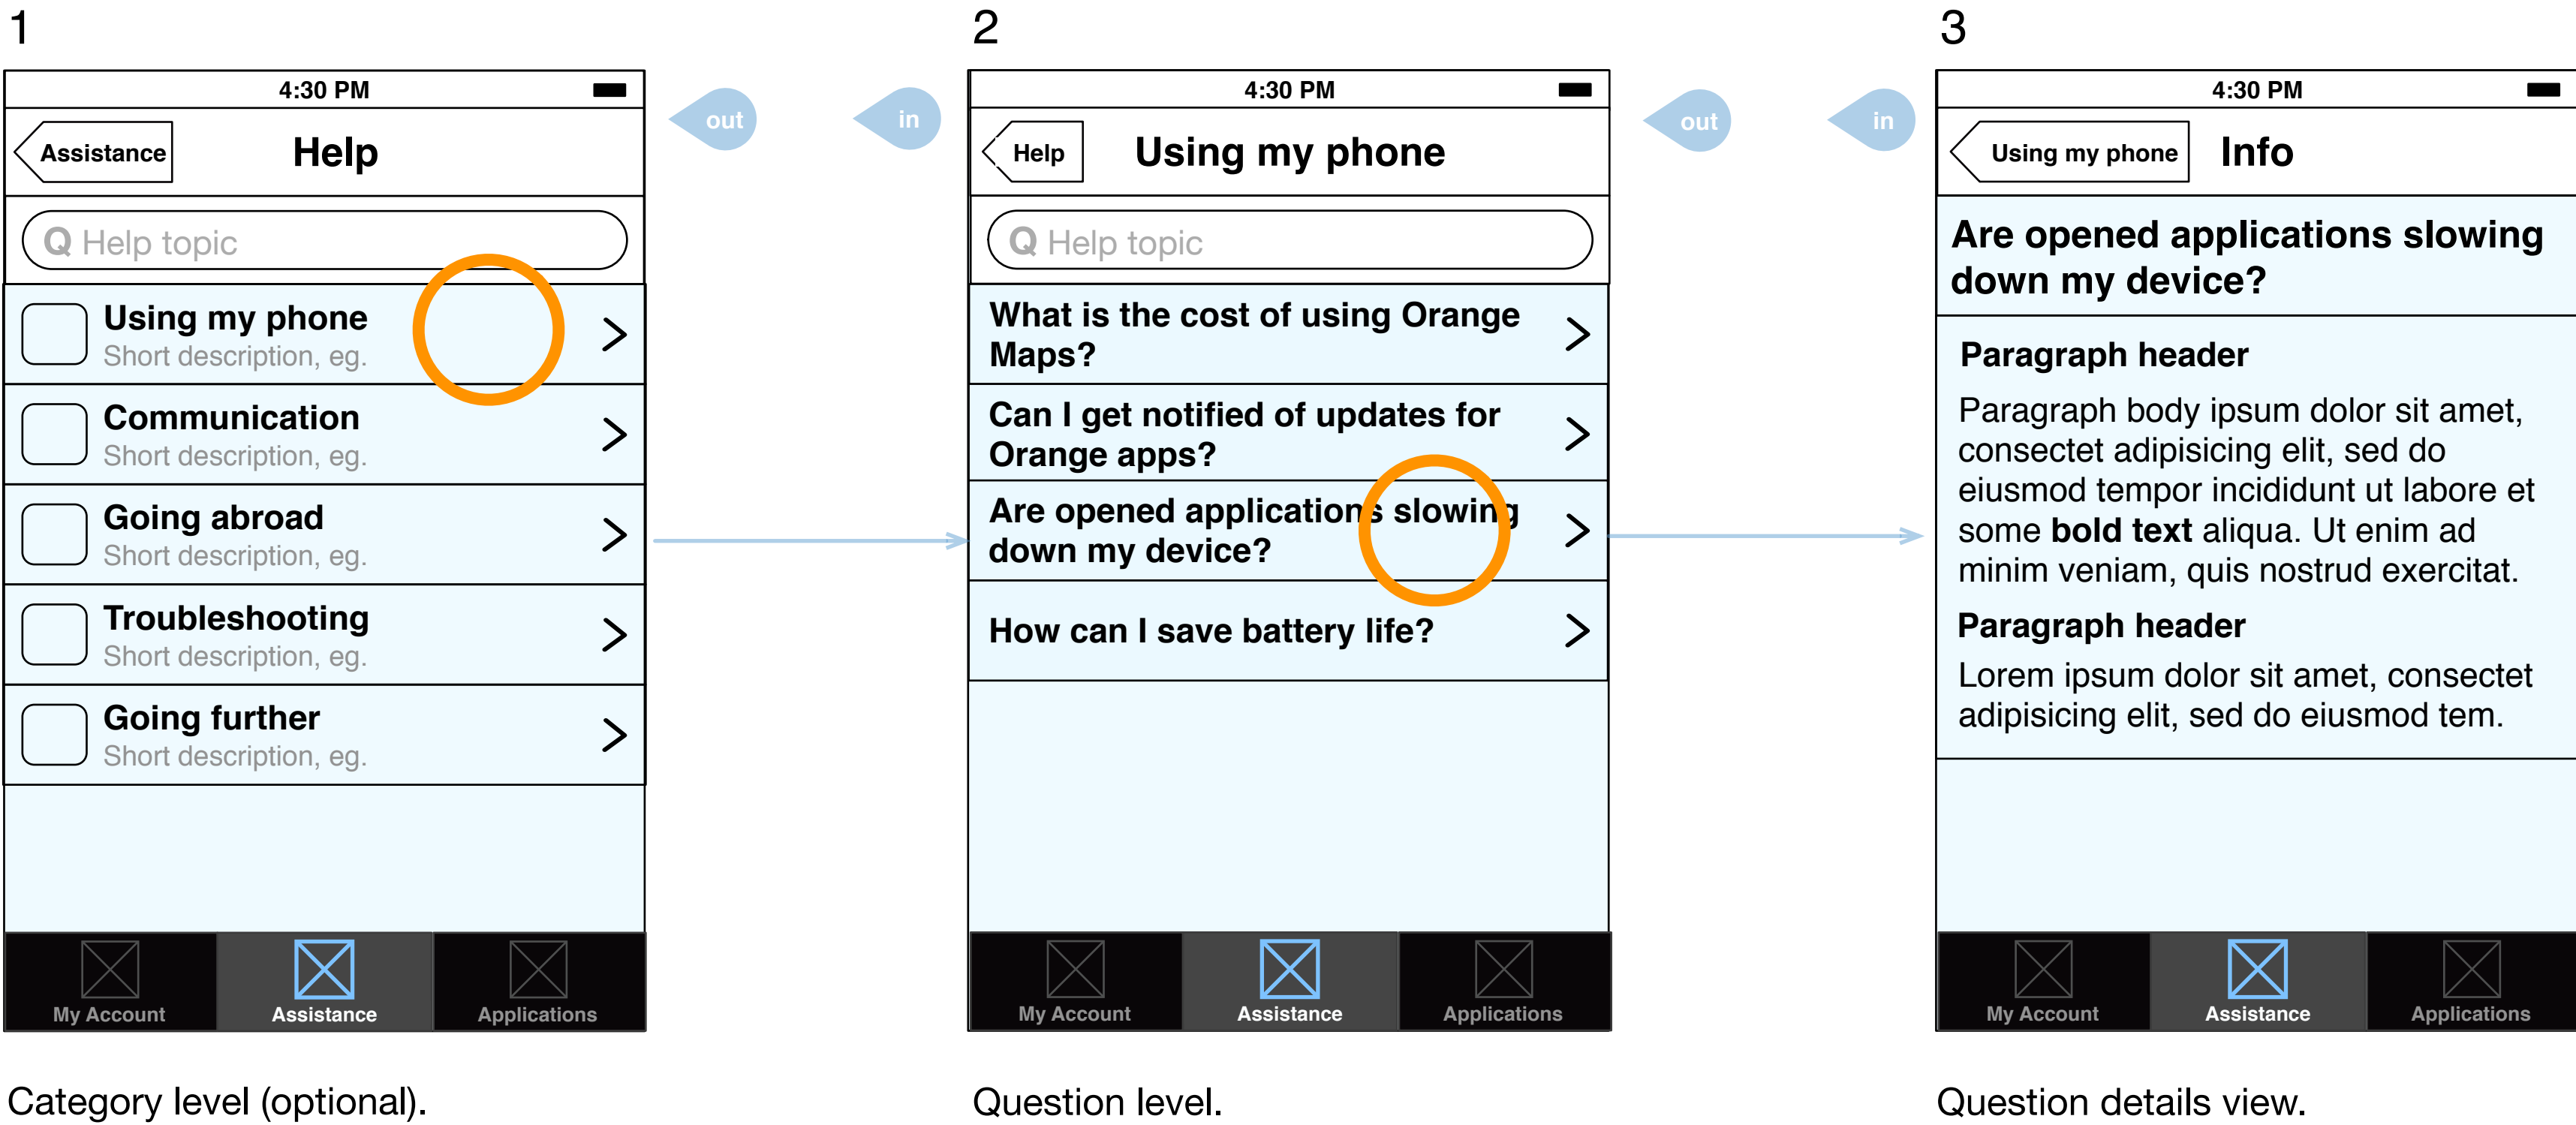

App details view.

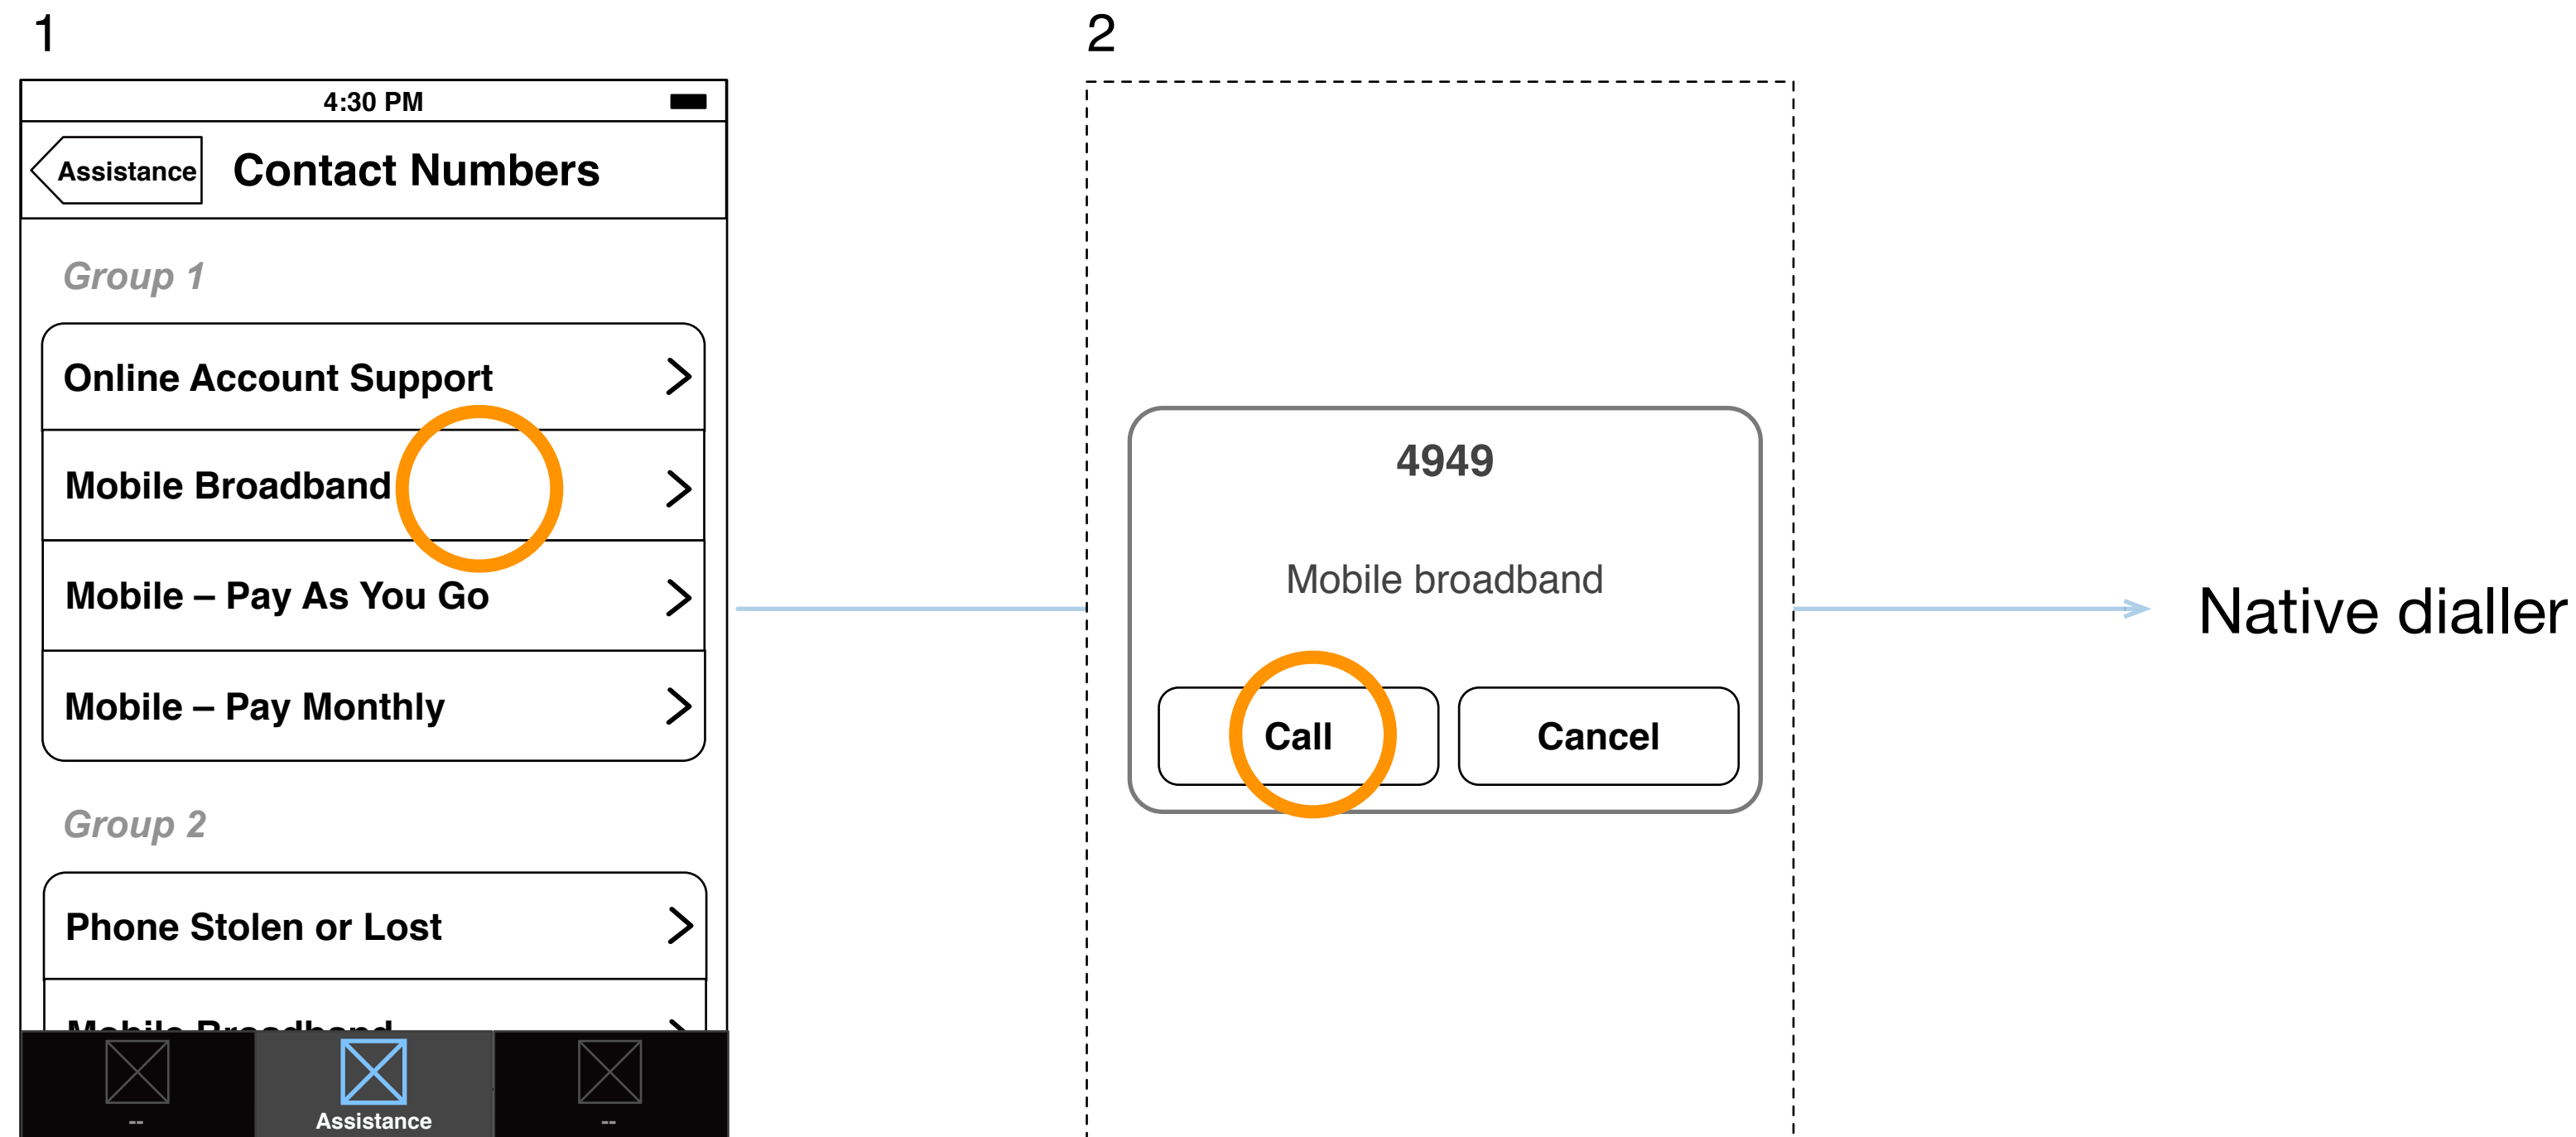

On selection of the button (if present), My Orange handles with the appropriate handler application the URI that is associated to the button. For instance, open in Safari.

Button label and associated URI are passed as data to My Orange. Instead of "Download" here, we could have eg. "View video" with a URL to a video that would open in the native media player.

2 FAQs

3 Contact numbers

Number descriptions are labels identifying the numbers.

Numbers and groups ordering is as received from backend.

Grouping is optional.

NOTE: list item layout is deliberately simple, in order to work in the largest number of languages (no number or icon displayed). Room kept for long descriptions.
